## I. CLAIM AMENDMENTS

Please amend the claims as indicated in the following listing:

1.  (currently amended) A method for displaying a web page on a hand held display device

    screen comprising:

        determining if the size of an image is larger than an allocated display area on the hand

    held display device screen;

        responsive to a determination that the image is larger than the allocated display area,

    dividing the image into a plurality of fragments; and

        displaying a web page with one of the fragments a fragment from the plurality of

    fragments in the allocated display area;

        wherein a number of fragments is determined by calculating a number of x axis

    divisions and a number of y axis divisions;

        wherein calculating the number of x axis divisions and the number of y axis divisions

    is based on pixels; and

        wherein the image is divided into a plurality of fragments without a translation into a

    bit map image or a raster image.

2.  (original) The method of claim 1 wherein the web page is displayed at a reduced resolution

    and the fragment is displayed at the image's intended resolution.

3.  (original) The method of claim 1 further comprising: responsive to a determination that the

    image is not larger than the allocated display area, displaying the unmodified image.

4.  (original) The method of claim 1 further comprising:

        determining if the web page contains the image; and

Attorney Docket No. AUS920030374US1
Serial No. 10/645,200
Response to Office Action mailed December 11, 2006

responsive to a determination that the web page contains the image, performing the

determining if the size of an image is larger than an allocated display area step.

5. (original) The method of claim 1 further comprising:

determining if the web page contains the image; and

responsive to a determination that the web page does not contains the image,

displaying the unmodified web page.

6. (original) The method of claim 1 further comprising: calculating the number of x-axis

divisions.

7. (original) The method of claim 1 further comprising: calculating the number of y-axis

divisions.

8. (original) The method of claim 1 further comprising:

determining if a user wants to navigate the image; and

responsive to a determination that a user wants to navigate the image, running an

navigation program.

9. (original) The method of claim 1 wherein the displaying step occurs on a hand held display

device.

10. (original) The method of claim 1 further comprising:

accessing the web page through a proxy; and

wherein the proxy sends only one fragment to a hand held display device.

11. (original) The method of claim 10 further comprising:

requesting another fragment; and

wherein the proxy sends another fragment to the hand held display device.

12. (original) The method of claim 1 wherein the image is stored in an image file ending in .gif,

.jpg, or .bmp.

13. (currently amended) A program product operable on a computer, the program product

comprising:

     a ~~computer-usable~~ computer usable medium;

    wherein the computer usable medium comprises instructions comprising:

        instructions for determining if the size of an image is larger than an allocated

display area;

        responsive to a determination that the image is larger than the allocated

display area, instructions for dividing the image into a plurality of fragments; and

        instructions for displaying a web page with ~~one of the fragments~~ a fragmenet from the

plurality of fragments in the allocated display area;

        wherein a number of fragments is determined by calculating a number of x axis

divisions and a number of y axis divisions;

        wherein calculating the number of x axis divisions and the number of y axis divisions

is based on pixels; and

        wherein the image is divided into a plurality of fragments without a translation

into a bit map image or a raster image.

14. (original) The program product of claim 13 wherein the web page is displayed at a reduced

resolution and the fragment is displayed at the image's intended resolution.

15. (original) The program product of claim 13 further comprising: responsive to a determination that the image is not larger than the allocated display area, instructions for displaying the unmodified image.

16. (original) The program product of claim 13 further comprising:

instructions for determining if the web page contains the image; and

responsive to a determination that the web page contains the image, instructions for performing the determining if the size of an image is larger than an allocated display area step.

17. (original) The program product of claim 13 further comprising:

instructions for determining if the web page contains the image; and

responsive to a determination that the web page does not contains the image, instructions for displaying the unmodified web page.

18. (original) The program product of claim 13 further comprising: instructions for calculating the number of x-axis divisions.

19. (original) The program product of claim 13 further comprising: instructions for calculating the number of y-axis divisions.

20. (original) The program product of claim 13 further comprising:

instructions for determining if a user wants to navigate the image; and

responsive to a determination that a user wants to navigate the image, instructions for running an navigation program.

21. (original) The program product of claim 13 wherein the instructions for displaying step occurs on a hand held display device.

22. (original) The program product of claim 13 further comprising:

instructions for accessing the web page through a proxy; and

wherein the proxy sends only one fragment to a hand held display device.

23. (original) The program product of claim 22 further comprising:

instructions for requesting another fragment; and

wherein the proxy sends another fragment to the hand held display device.

24. (original) The program product of claim 13 wherein the image is stored in an image file

ending in .gif, .jpg, or .bmp.

25. (currently amended) A program product operable on a computer, the program product

comprising:

a ~~computer usable~~ computer usable medium;

wherein the computer usable medium comprises:

a an image modification program; and

a navigation program;

wherein the image modification program further comprises:

instructions for determining if the size of an image is larger than an allocated

display area;

responsive to a determination that the image is larger than the allocated display

area, instructions for dividing the image into a plurality of fragments; and

instructions for displaying a web page with a fragment from the plurality of

fragments in the allocated display area;

wherein a number of fragments is determined by calculating a number of x axis

divisions and a number of y axis divisions;

Attorney Docket No. AUS920030374US1
Serial No. 10/645,200
Response to Office Action mailed December 11, 2006

> wherein calculating the number of x axis divisions and the number of y axis divisions
>
> is based on pixels; and
>
> wherein the image is divided into a plurality of fragments without a translation into a
>
> bit map image or a raster image.

26. canceled.

27. (currently amended) The program product of claim ~~26~~ 25 wherein the web page is displayed

at a reduced resolution and the fragment is displayed at the image's intended resolution.

28. (currently amended) The program product of claim ~~26~~ 25 further comprising: responsive to

a determination that the image is not larger than the allocated display area, instructions for

displaying the unmodified image.

29. (currently amended) The program product of claim ~~26~~ 25 further comprising:

instructions for determining if the web page contains the image; and

responsive to a determination that the web page contains the image, instructions for

performing the determining if the size of an image is larger than an allocated display area

step.

30. (currently amended) The program product of claim ~~26~~ 25 further comprising:

instructions for determining if the web page contains the image; and

responsive to a determination that the web page does not contains the image,

instructions for displaying the unmodified web page.

31. (currently amended) The program product of claim ~~26~~ 25 further comprising: instructions

for calculating the number of x-axis divisions.

32. (currently amended) The program product of claim ~~26~~ 25 further comprising: instructions

for calculating the number of y-axis divisions.

33. (currently amended) The program product of claim 26- 25 further comprising:

 instructions for determining if a user wants to navigate the image; and

 responsive to a determination that a user wants to navigate the image, instructions for

running an navigation program.

34. (currently amended) The program product of claim 26 25 wherein the instructions for

displaying step occurs on a hand held display device.

35. (currently amended) The program product of claim 26 25 further comprising:

 instructions for accessing the web page through a proxy; and

 wherein the proxy sends only one fragment to a hand held display device.

36. (original) The program product of claim 35 further comprising:

 instructions for requesting another fragment; and

 wherein the proxy sends another fragment to the hand held display device.

37. (currently amended) The program product of claim 2625 wherein the image is stored in an

image file ending in .gif, .jpg, or .bmp.
